

# Training & Placement Cell

## Training & Placement Cell

- Knowledge – Aptitude – Attitude – Commitment –

Training and Placement Cell of the Institute was formally established in the year 2001 and has been coordinating the Placement, Industrial training and Project coordination of B.E / M.E, M.Tech / MCA and B.Architecture / M.Architecture students since then. During the past six years, there had been around 100 visits by various companies and Industrial houses of International Repute and MNCs for the Campus Recruitment of students. The average package during last two years was Rs.3.00 Lac – Rs.6.00 Lac CTC per annum. Students at M.I.T.S get recruitment at III year level itself and those selected undergo rigorous training at the companies during vacations to keep themselves updated about the advancements of soft and hard technologies.

To enhance quality of students and academic improvement, performance upgradating, knowledge and information decimation, Institute is already on the threshold of implementing innovative strategy. The strategy includes knowledge addition, project collaboration, personality development, capacity building, campus connect programmes and Industry Institute collaborations.

The objective of the T&P Cell is to build relationships between organization and students of all levels by providing access to a highly impressive pool of candidates. M.I.T.S students offer a balance of theory, practical skills and real world experience and are individuals, who meet the standards of best practice for National and International Employers.

To help organizations for recruitment of students, Placement Cell offers recruitment consultancy, professional expert advice and recruitment strategies.
